

See the Big Picture Hidden in Reams of Data and Volumes of Reports

Agilex Interactive Visualization is a customizable management solution for synthesizing large numbers of reporting metrics into an intuitive, interactive and graphical user display.

Agilex Interactive Visualization integrates data from different sources into a single display that quickly and effectively illustrates the 'big picture' hidden in reams of data and volumes of reports. As a result, users can more readily and confidently assess the status of a thousand or more performance metrics in the context of their operational significance. Unlike traditional dashboards, Agilex Interactive Visualization is customized to the unique needs of the organization; spans multiple applications and data sources; and utilizes perceptual, cognitive and operational analysis to deliver contextually-driven insight.

Features

Agilex Interactive Visualization is a comprehensive solution delivering:

- **Contextual Data Visualization** – Not only is data displayed graphically, but it is also rendered contextually so that users can readily assess the relationship and importance of this information. Coupled with the use of specific chart and display formats optimized for the application, this enables user to secure more insight faster.
- **Real-time Insight** – As it is fully-integrated into existing enterprise management systems, it delivers up to the minute insight into the performance of key projects, processes and systems. User-defined alerts can be

used to proactively highlight threshold violations and other unanticipated events.

- **User-driven Discovery** – Executives are empowered to drill down and interact with complex data sets, navigating and exploring the dynamic relationships between KPIs. They can also create new visual perspectives and graphical configurations to further investigate specific queries.

Customized for real-world requirements:

- **Engineered for Decision-Making** – Each implementation is led by our team of experts in mathematics, psychology, and human computer interaction, and

supported by additional specialists in software development and business management. Using our exclusive methodology, they configured Agilex Interactive Visualization to best address the unique requirements and expectations of each user.

- **Heterogeneous Data Extraction** – With deep expertise in data integration, quality, modeling and analysis, we can tap into all of your data to give you the whole picture to how your organization is operating. Agilex Interactive Visualization has been implemented in some of the world's most complex commercial and public sector environments, including within the Intelligence Community.

"...the most practical, most integrated representation of the issue available..."

- Director of Intelligence,
government agency client

See the Big Picture Hidden in Reams of Data and Volumes of Reports

- **Platform Independent** – Agilex Interactive Visualization can be readily customized using popular software tools, including open source and Microsoft .NET, to meet each organization's unique requirements.

Benefits

Enhanced Productivity – A five minute review of Key Performance Indicators (KPIs) can replace hours of tedious analysis.

Smarter Decisions – With access to the big picture, resources can be utilized more effectively while obstacles and challenges are remediated before they impact performance.

More Consistent Execution – As a real-time, interactive solution, managers can more readily track the ongoing performance of complex program portfolios encompassing thousands of metrics.

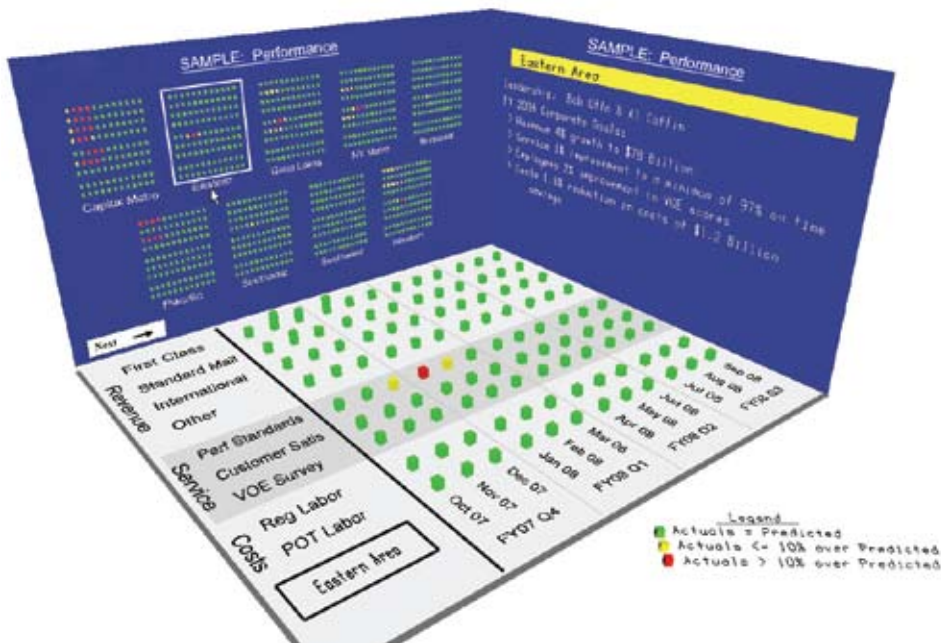

Greater Transparency – Meet new accountability mandates with no additional staffing as critical questions can now be quickly addressed without disrupting operations.

Operate More Efficiently – With ready access to decision-making criteria, users can operate more efficiently, with one organization cutting the time and resources required for a complex evaluation process in half.

Closer Collaboration – As a web-based platform, distributed teams can work collaboratively to solve problems by analyzing, sharing and querying data.

"...we've spent the last year rolling out a dashboard system, and your visualizations are better than anything we have, at a fraction of the time and money we've spent..."

– Executive Vice President, large commercial client

About Agilex

Agilex is an employee-owned enterprise application, solution, and advisory firm. Our noteworthy business and technology professionals offer innovative thinking on leveraging advanced technologies. We make it possible for our clients to optimize systems and exploit data to realize the value of information. Headquartered in Chantilly, Virginia, Agilex has delivered significant results for an impressive list of clients throughout federal, state and local government, and within global 2000 corporations.
