

Making Information Accessible and Actionable in the Field

For an increasingly mobile workforce, Agilex develops intuitive and secure solutions that improve productivity and enhance operational performance.

Agilex helps government agencies and other large enterprises fully capitalize on the latest advances in mobile computing. We bring together innovative design with world-class technical resources to develop mobile applications that integrate seamlessly into your most dynamic business processes and most critical operating environments. All of our solutions build upon our enterprise-level expertise in software development, application integration, data management and the operations of leading wireless platforms.

Features

Custom application development for a number of mission-specific requirements, including:

- **Emergency Response Management** – Providing first responders with situational awareness, geospatial information and other command & control tools.
- **Field Inspection** – Standardized, template-driven processes for capturing, evaluating and reporting information.
- **Performance Dashboards** – Configurable scorecards for assessing real-time operational metrics.
- **Biometric Identification** – Enabling assured recognition and classification of individuals in the field.
- **Asset Management** – Identification, authentication and tracking of physical assets across remote environments.

- **Case Management** – Giving case workers direct access to documents and processes on location.
- **Personal Productivity** – On-demand access to productivity tools and enterprise information for executing core business tasks.
- **Constituent Services** – Providing citizens with customized applications to streamline, automate and improve their interactions with government.
- **Transaction Processing** – Bringing secure e-commerce capabilities to remote locations.

Support for all major operating systems, including Apple iPhone, Google Android, Java ME, Microsoft Windows Mobile, Research in Motion BlackBerry, and Symbian:

- Agilex was the first company within the federal marketplace to qualify for the Apple Authorized Systems Integrator program.

Agilex specializes in mobile application data synchronization across complex, heterogeneous operating environments:

- Demonstrated leadership in Master Data Management (MDM) and Data Integration strategies for creating and maintaining 'one version of the truth'.
- Services for integrating mobile platforms with leading third-party applications, including Messaging, Calendaring, Business Intelligence, CRM and ERP (Financials & HCM).

Comprehensive strategies and best practices for application portability:

- Agilex helps organizations implement Mobile Enterprise Application Platforms (MEAP) and Mobility Solution Centers to streamline the deployment and management of applications across multiple platforms.

Keeping Amtrak on the Move - Agilex is helping America's passenger railway capitalize on wireless devices to support its highly-mobile workforce.

Competencies

Strategy – Our experienced consultants are experts in business process and requirements analysis and can help identify the right platform and network for nearly any requirement.

Software Development – We offer best-in-class resources for the full software development lifecycle, including project management, software programming, user interface design, testing, product documentation, and software packaging and release management.

System Engineering & Integration – Agilex delivers the complete solution, including assimilation of third-party systems, such as scanners and biometric readers; integration with back-office applications, databases and device management platforms; and data modeling and management.

Certification & Accreditation – With extensive experience in the C & A process, we help clients architect and document mobile applications to fulfill critical government regulations, such as the Federal Information Processing Standards, the Department of Defense Information Assurance Certification and Accreditation Process (DIACAP) and the Federal Information Security Management Act (FISMA).

Deployment – Agilex offers role-based configuration for all applications and platforms as well as training to streamline end-user adoption.

About Agilex

Agilex is an employee-owned provider of mission and technology solutions to the national security, healthcare and public sectors. Realize the Value of Information® is our corporate mantra as we help clients unlock the value of information while reducing the cost to manage it. Our notable professionals include former federal CIOs, multiple patent holders, and architects for some of the U.S. government's most critical IT systems. Headquartered in Chantilly, Virginia, the company has delivered significant results for an impressive list of clients throughout federal, state and local government, and within global 2000 corporations.
